SESSION V – SAFETY COMMITTEE *Part B*

Incident Analysis

In this workshop learn about the “systems approach” to incident analysis and how to use it to delve past superficial causes down to the true root causes of incidents. Also learn about the key steps in the analysis process and the hierarchy of controls as it relates to identifying corrective measures that will prevent similar events from occurring. Attendees will have the opportunity for practical application of analysis skills learned. This session satisfies the Oregon OSHA requirement for safety committee incident analysis training.

Presented by: Patti McGuire, Senior Safety Management Consultant for SAIF Corporation.

Patti McGuire is a Senior Safety Management Consultant for SAIF Corporation. She has been with SAIF since November of 2013 and works with employers in Jackson, Klamath and Lake Counties to improve their safety and health programs and reduce injuries. Previously she was the Manager of Occupational Health and Safety for Harry & David, overseeing safety and health programs for multiple facilities and 50+ retail stores nationwide. She also spent five years working in human resources in Wood Products manufacturing and fifteen years in Retail in district and store level operations. Patti is an Oregon native and has an AS degree in Business Administration-Accounting, however she was drawn to the field of Human Resources and Safety early in her career after a workplace fatality affected her family and her employer.

SESSION IV – SAFETY COMMITTEE *Part A*

Hazard Identification for Safety Committees

It's one thing to spot hazards in the workplace. It's another to stop them from happening. This session reviews those real-world hazards found in various workplaces and analyzes them further to get to the root of the problem. Both traditional and creative solutions are shared along with case studies that might surprise you. This workshop also offers a summary of the Oregon OSHA requirements for safety committees as well as tips and tools for performing effective hazard assessments and accident investigations.

Presented by: Craig Hamelund, Oregon OSHA Internal Training Specialist

Craig graduated in 1993 from Ferris State University in Big Rapids, Michigan with a bachelor's degree in industrial and environmental health management. Before moving to OR, Craig was a safety compliance officer for South Carolina OSHA. He began his career with Oregon OSHA in 1995 as a safety compliance officer in Medford. In 1998, Craig joined Oregon OSHA's Public Education Section conducting safety and health workshops and training sessions for Oregon's employers and employees. Craig became Oregon OSHA's Internal Training Specialist in 2006 providing safety and health training to all Oregon OSHA staff.

SESSION I – SAFETY MANAGEMENT

Teaming Up with Your Occupational Health Physician

The success of any business relationship originates with an agreed partnership founded on quality communication mutual understanding, a shared vision, and a team approach to success. This is especially true when protecting the health and safety of your workforce. This presentation aims to outline understanding and key principles to establishing & maintaining an effective and successful partnership with your Occupational Health Provider.

Presented by: JARED K. HILL, MOT, OTR/L Director of Operations for Asante Physician Partners Work Health

Jared is the Director of Operations for Asante Physician Partners, an Occupational Health Consultant, and a practicing occupational therapist, for Asante Work Health. He began his career with Asante in 2002, working as an occupational therapy provider and has transitioned from practicing therapist to administrative operations over the past 16 years. His areas of expertise include hand therapy, functional capacity evaluation, and ergonomic consultation. He has a master's degree in occupational therapy & received his B.S degree in therapeutic recreation from the University of Utah in 1999. He is certified as an Occupational Health Practice Manager and Ergonomic Evaluation Specialist. Mr. Hill has sat on the executive board for the Southern Oregon Chapter of ASSE and participated in various responsibilities associated with the ASSE conference committee.

SESSION II – INDUSTRIAL HYGIENE

Hearing Conservation

A Hearing Conservation program requires three steps: management, noise monitoring and feasible engineering controls. The management plan needs to include sampling communication, annual training, a written plan, code availability, and annual audiograms. Monitoring should include area sampling and personal dosimetry. Finally, engineering controls should be documented and used whenever possible.

Presented by: Paul Utterback, MS, EdM, CIH is a Senior Hygiene Consultant OR-OSHA.

Paul has been an industrial health consultant for 25 years. He works with general industry, medical, construction and agriculture. He attended college in Maine and achieved his Master's in Boston and Louisiana. Paul has conducted sound level sampling in most industry types & has helped employers create successful hearing conservation programs.

SESSION III – HUMAN RESOURCES

Post Injury Management

Workplace injuries cost employer's money and have the potential to create a lot of uncertainty for the worker. Learn what you can do to help and why it's important.

Presented by: Donna Johnson, Return to Work Consultant for SAIF Corporation.

Donna started her career at SAIF as an Investigator in May 2012 and transitioned to a Return to Work Consultant in July 2016. Previously she spent almost 14 years with the Department of Justice, the last 4 years as a Child Support Program Investigator. Donna worked 5 years in Employment and Training connecting employers with workers who had been out of the workforce or just entering it for the first time.
